INFOR CloudSuite

CHEMICAL ERP

Comprehensive cloud ERP for the chemical industry.

Cloud ERP built for chemical makers, covering raw materials to market, complex operations, formula optimisation, quality and traceability.

01	02	03	04	05	06
Raw Materials	Formulation	Production	Quality	Compliance	Market

OVERVIEW

ERP purpose-built for chemical manufacturing

Beyond core finance, manufacturing and supply chain, it adds multi-facility planning, tank scheduling, enhanced quality control and traceability, formula optimisation and compliance management.

AI-driven automation supports yield and batch optimisation, quality management and product recommendations.

SEGMENTS SERVED

- Resins and plastics
- Agricultural chemicals
- Coatings, adhesives and sealants
- Elastomers and pigments
- Lubricants and cleaners

KEY BENEFITS

Why manufacturers choose it

Faster time to value

Prebuilt processes, data models and user experiences cut the need for customisation or outside help.

Future-proof innovation

AI-driven automation for yield and batch optimisation, quality management and product recommendations.

Deep industry specificity

Handles seasonality, attribute costing, co-product and by-product planning, back flushing and formulation management.

Improved profitability

Better profitability insight, lower costs, production efficiency and supply chain collaboration.

CAPABILITIES

Eight capabilities. One platform.

01 Global compliance and localisation

Multi-country, company, language and site configuration that fits regional rules while keeping global standards.

02 Custom-built for chemicals

Industry process catalogs, role-based workspaces and chemical-specific analytics.

03 Supply chain management

Planning for simple and complex manufacturing and distribution networks, including seasonal buyers.

04 Manufacturing operations

Planning, management and monitoring of simple and complex processes with regulatory attention.

05 Financial management

Budgeting, multi-currency support, real-time reporting, and cash flow and profitability visibility.

06 Enterprise asset management

Maintenance planning, diagnostics, preventive and warranty management, and equipment profitability.

07 Rich analytics

Prebuilt data models, dashboards, reports, measures and attributes.

08 Role-based experiences

Customisable workspaces with embedded AI insights, unified home pages and alerts.

AI AND ANALYTICS

Intelligence built into every process

Infor Velocity Suite

An all-inclusive AI package for every CloudSuite: industry AI agents, GenAI, process mining, automations and implementation experts, at one flat fee.

Industry AI agents **GenAI** **Process mining** **Automations** **Implementation experts**

CHEMICAL-SPECIFIC FEATURES

- Multi-facility planning and production scheduling
- Tank scheduling and liquid management
- Enhanced quality control and traceability
- Formula and recipe optimisation
- Compliance management
- Co-product and by-product planning

THE PLATFORM AND RECOGNITION

Industry cloud platform

Supports system integration, RPA-based process automation, GenAI productivity and AI-powered analytics. Gartner ranked Infor #1 in process manufacturing for the sixth consecutive year (2025).

Integration **RPA** **GenAI** **AI analytics**
