OVERVIEW

The top cloud ERP for food and beverage

Connects people, data and processes through a secure, multi-tenant cloud, from raw ingredients to finished goods.

Better sales and customer service, compliance support and track and trace, optimised production and quality control, and real-time supply chain visibility, with AI automation that frees teams for growth.

SEGMENTS SERVED

- Bakery
- Beverage
- Dairy
- Food ingredients
- Meat, poultry and fish

KEY BENEFITS

Why manufacturers and brands choose it

Industry expertise, built in

Designed by industry experts, with micro-vertical practices for specific manufacturing and software needs.

Future-proof innovation

AI-driven automation for yield optimisation, quality management and product recommendations.

High value, low risk

Built-in F&B processes and workspaces speed adoption, backed by end-to-end services and a partner ecosystem.

Compliance and traceability

Compliance support and track and trace through the whole process, including recalls and shelf life.

CAPABILITIES

End-to-end functionality for F&B

01 Flexible enterprise structure

Multi-country, company, language and site configuration, plus procurement, projects, operations, finance and sales.

02 Industry content

Process catalogs, role-based workspaces and F&B-specific analytics and reporting.

03 Customer sales and service

360-degree customer view: orders, quotes, trade agreements, bulk orders, POS integration and delivery schedules.

04 Supply chain management

Planning and procurement for perishable goods, for simple and complex distribution networks.

05 Enterprise asset management

Maintenance planning, diagnostics, preventive maintenance, warranty and equipment profitability.

06 Manufacturing operations

Planning and monitoring of simple and complex processes, with traceability, recalls and shelf life.

07 Financial management

Controlling, accounting, planning and outcome simulation to cut costs and redeploy assets.

08 Portals and users

Consumer-grade interface across factory-floor devices and portals for users, customers, suppliers and contractors.

AI AND ANALYTICS

Intelligence built into every process

Infor Velocity Suite

An all-inclusive AI package for every CloudSuite: industry AI agents, GenAI, process mining, automations and implementation experts, at one flat fee.

- Industry AI agents
- GenAI
- Process mining
- Automations
- Implementation experts

CUSTOMER STORIES

Nutreco

A global animal nutrition leader that used cloud ERP to streamline operations and support sustainable farming.

Amalthea

A Dutch cheese producer that increased profit and reduced waste.

My Food Bag

A meal kit provider that improved order accuracy, logistics and delivery efficiency.

Zeelandia

A bakery ingredients supplier that streamlined processes, cut waste and improved inventory across regions.

PROVEN RESULTS

EUR 500K
saved for each 1% yield increase at Amalthea

#1
in process manufacturing in Gartner Critical Capabilities for Cloud ERP (2025)

6th
consecutive year ranked #1 in process manufacturing
