INFOR CloudSuite

INDUSTRIAL MANUFACTURING ERP

Manufacturing ERP purpose-built for your industry.

AI-powered cloud ERP with manufacturing functionality built in, not bolted on, for machinery, electronics, metal fabrication and other manufacturers.

Planning	Production	Quality	Supply Chain	Projects	Analytics

OVERVIEW

Built in, not bolted on

Cloud ERP for organisations of any size or complexity, improving productivity, profitability and decision-making, with industry functionality down to the micro-vertical level.

It runs on a secure, AWS-powered cloud and is strengthened by Infor Velocity Suite, which embeds AI agents, GenAI, automations and process mining into ERP workflows.

BUILT FOR

- Machinery and equipment
- Electronics
- Metal fabrication
- Medical devices
- Building products

KEY BENEFITS

Why manufacturers and brands choose it

Better, faster decisions

Integrate inventory, production and supply chain data to boost productivity and cut inefficiencies.

Safety and compliance

Meet current regulations, ESG standards and cybersecurity measures to keep manufacturing secure and uninterrupted.

Enhanced collaboration

Connect internal teams, vendors and suppliers with real-time data.

Faster innovation and growth

Use industry AI, analytics, process mining and RPA to automate complex tasks.

CAPABILITIES

Eight capabilities. One platform.

01 Financial management

Budgeting, reporting, intercompany trade and taxation, and ESG reporting across entities.

02 Supply chain operations

Procurement, scheduling and demand forecasting, with real-time supplier coordination.

03 Project and program delivery

Built-in contract management, manufacturing KPIs and visibility into projects, resources and timelines.

04 Inventory and warehouse

Multi-warehouse inventory and order fulfilment with real-time tracking.

05 Advanced planning and scheduling

Capacity planning for high-mix, variable-volume production across ETO, MTO and MTS.

06 Human capital management

Workforce planning, recruiting and performance tracking aligned with production goals.

07 Built-in quality and compliance

Out-of-the-box inspections, audits and correction of quality issues.

08 Real-time analytics

Advanced analytics, industry KPIs, data lakes and process mining.

CHOOSE YOUR EDITION

Two editions, one purpose

CloudSuite Industrial Enterprise

For large manufacturers with multi-site, multi-company and multi-country operations, across process, distributed, project-centric, highly customised and service-intensive environments.

- Industrial Machinery
- Electricals and Electronics
- Metal Fabrication
- Windows and Doors
- Medical Devices
- Furniture
- Plastics
- Building Products
- Packaging

CloudSuite Industrial

For growing manufacturers: discrete, mixed-mode and project-based environments, including job-focused, configure-to-order and service-oriented operations.

- Industrial Machinery
- Electronics
- Metal Fabrication
- Medical Devices
- Furniture
- Plastics
- Building Products
- Engineering and Construction
- Aerospace and Defense
- Automotive
- Food and Beverage

CUSTOMER STORIES

Kattsafe

Height-safety manufacturer using Velocity Suite to automate order entry and grow without matching headcount.

Zahid Group

Used process mining and AI-assisted automation to standardise invoice-to-cash workflows.

Marmon

Commercial food and beverage equipment maker consolidating brands and modernising processes.

Solar Turbines

Operates over 16,000 units in 100+ countries, shifting toward aftermarket services.
