Tender	Job Costing	Procurement	Subcontractors	Billing	Final Account

WHY PRONTO XI

Built for thin margins and complex projects

Australian construction and engineering businesses operate on thin margins, with complex project structures, subcontractor networks and heavy compliance demands.

Pronto Xi links every moving part into one integrated view, so the project manager, CFO and managing director all see the same numbers.

SUITED TO

- Building
- Civil
- Industrial
- Thermal
- Infrastructure

THE CHALLENGES

What holds construction businesses back

Cost overruns from poor visibility

Teams work from separate spreadsheets.

Pronto Xi: a shared live view of committed costs, earned value and forecast final cost.

Manual subcontractor management

Payments, retentions, tax, insurance and safety documents are labour-intensive.

Pronto Xi: automates the workflow from contract setup to final account.

Disconnected estimating, procurement and financials

Tender estimates never reach the project ledger.

Pronto Xi: carries the winning estimate into job costing from day one.

Compliance and reporting burden

WHS, subcontractor management, Modern Award payroll, Fair Work and project reporting.

Pronto Xi: captures compliance and workforce data within daily workflows.

THE SOLUTION

One system. Every moving part.

01 **Project and job costing**

Multi-level CBS, committed-cost tracking, earned-value reporting and live forecast-to-complete. Time cards, purchase orders, subcontractor claims and deliveries feed project costs in real time.

02 **Subcontractor management**

Onboarding, insurance tracking, progress claims, retention, payment schedules, statutory compliance and a full audit trail.

03 **Progress billing and retention**

Schedule-of-rates billing, milestone-based claims, and retentions held and released per contract, so cash-flow forecasts reflect actual status.

04 **Real-time financial visibility**

A single general ledger across multiple entities, projects and currencies, with consolidated reporting, cash-flow forecasting and live dashboards.

CAPABILITIES

Everything a construction business needs, nothing it doesn't

- Job costing and project accounting with committed-cost tracking
- Subcontractor management and progress claims
- Plant, equipment, resource and tool tracking
- Procurement and materials management
- Multi-entity and multi-project consolidation
- Progress billing and retention management
- Time capture from mobile and site
- Integrated financials, payroll and compliance reporting
- Real-time management dashboards
- Cloud-hosted or on-premises deployment

COMPLIANCE

Built for today's compliance environment

Integrated financials and payroll, supported by experienced ERP specialists.

STP **Payday Super** **Award management** **Subcontractor documentation** **Statutory reporting**

COMMON QUESTIONS

What is construction ERP software?

An integrated system for project costing, subcontractor management, procurement, assets, payroll and financials, replacing disconnected tools and spreadsheets.

Can Pronto Xi handle job costing for large projects?

Yes, including multi-year, multi-entity and joint-venture structures.

How does Pronto Xi manage subcontractors?

The full workflow, from onboarding and compliance tracking to final account, with audit-ready records.

Is it suitable for civil engineering and infrastructure firms?

Yes, across building, civil, industrial, thermal and infrastructure sectors.

Does it support multi-entity and joint ventures?

Yes, with consolidated reporting and role-based access for partners.
