PRONTO Xi

ERP FOR MINING

The mining ERP software for your business.

Cost control, safety compliance and remote operations in one system. Pronto Xi links asset management, project costing, procurement, compliance and financials from exploration to site retirement.

Exploration	Development	Production	Maintenance	Pit-to-Port Cost	Retirement

WHY PRONTO XI

Built for asset-heavy, remote operations

Mining depends on cost control, safety compliance and the ability to operate far from the city office.

Pronto Xi tracks every asset, captures cost as it happens and keeps crews working even when the network drops.

KEEP RUNNING

- Dozers
- Drills
- Haul trucks
- Fixed plant
- Remote sites and FIFO crews

THE CHALLENGES

What costs mining operations most

Asset-heavy, downtime-sensitive operations

Unplanned downtime of dozers, drills, haul trucks and fixed plant is the largest controllable cost.

Pronto Xi: asset life cycle tracking and preventive maintenance.

Remote sites and limited connectivity

Networks drop, satellite is the fallback, and operations cannot wait for the city office.

Pronto Xi: offline-capable mobile apps with satellite and low-bandwidth support.

Pit-to-port cost visibility

Cost-per-tonne calculated only at month-end means decisions use outdated data.

Pronto Xi: real-time cost capture against mine plan, project and cost centre.

FIFO workforce complexity

Rostering, EBAs, site allowances, STP Phase 2 payroll and Modern Award compliance across multiple sites.

Pronto Xi: FIFO payroll and rostering support.

THE SOLUTION

One record for every asset and dollar.

01 ### Asset and maintenance management

Track each asset from acquisition to retirement in a single record. Scheduled, meter-driven and condition-based maintenance; AS/NZS compliance, statutory inspections and operator licence expiry alerts; mobile work orders and digital job cards from remote sites, synced when connected.

02 ### Remote mining operations

Offline-capable mobile apps that sync when connectivity returns, with interfaces tested for satellite and low-bandwidth sites.

03 ### Real-time pit-to-port cost visibility

Shared live cost data for operations managers, mine superintendents and CFOs, so decisions use today's numbers, not month-end ones.

04 ### Mine project costing and procurement

WBS-level costing for exploration, development and production, with committed costs, earned value and forecast final cost. Procurement suited to remote logistics.

CAPABILITIES

Everything a mine needs on one platform

- Asset life cycle and maintenance management
- Mobile maintenance with offline capability
- Procurement and supplier management
- FIFO workforce payroll and rostering support
- Real-time financial reporting and analytics
- Satellite and low-connectivity mobile support
- Cloud-hosted or on-premises deployment
- Preventive and condition-based maintenance scheduling
- Project and cost-centre mine costing
- Spare parts and consumables inventory
- Compliance and certification tracking
- General ledger, accounts payable and accounts receivable
- Business intelligence dashboards and reports

COMPLIANCE

Built for mining compliance

Safety, certification and workforce obligations built into the product.

AS/NZS standards

Statutory inspections **Mining EBAs**

FIFO rosters **Site allowances**

STP Phase 2 **Modern Award**

COMMON QUESTIONS

What is mining ERP software?

An integrated system covering operations and finance (asset maintenance, costing, procurement, inventory, payroll and compliance) on one data model.

How does Pronto Xi support remote sites?

Its mobile apps work offline and sync when a connection is available, covering maintenance, inspection, time capture and parts requests.

Can Pronto Xi manage asset maintenance?

Yes, across the full asset life cycle, with mobile capture at the face and a complete cost and maintenance history per asset.

Does it support mining payroll?

Yes, including EBAs, FIFO rosters, site allowances, STP Phase 2, Modern Award compliance and mining payroll reporting.
