PRONTO Xi

ERP FOR RETAIL

Retail ERP built for how your business works.

Stores, online sales and click-and-collect on one platform. Pronto Xi links POS, inventory, purchasing, financials and eCommerce so the whole business works from the same live data.

WHY PRONTO XI

From POS to boardroom, on one platform

Retail technology often grows in layers: separate POS, eCommerce and accounting systems that produce disconnected, manually reconciled data.

Pronto Xi replaces the patchwork with one integrated platform, so customers' expectations on stock and service are always met.

RETAIL FORMATS

- Specialty retail
- Fashion and apparel
- High-SKU general retail
- Multi-store and multi-channel
- Jewellery, pet, safety, sports, convenience

THE CHALLENGES

What holds retailers back

Disconnected POS, eCommerce and back-office

Inventory drifts, reporting becomes a monthly reconciliation task and the customer experience suffers.

Pronto Xi: one integrated platform keeps every system in sync.

Poor inventory visibility across channels

Stockouts on high-margin lines, overstocks on slow movers and split orders the system said it could fulfil.

Pronto Xi: real-time, cross-channel inventory accuracy.

Manual reporting that eats management time

Weekly reports built by exporting data from three systems into Excel.

Pronto Xi: reporting produced automatically by the ERP.

Compliance and cost pressure

Stitching payroll, finance and compliance systems together adds cost and complexity.

Pronto Xi: integrated financials and payroll, with direct ATO integration for STP and Payday Super.

THE SOLUTION

Six modules. One view of the business.

01 **ERP-integrated POS**

The Pronto Xi POS App is part of the ERP, not an add-on. Sales, stock, pricing, promotions and loyalty flow in real time, in every store.

02 **Purchasing and suppliers**

Vendor scorecards, EDI, contract pricing, rebate management and import-order tracking, with live performance data for buyers.

03 **Real-time inventory**

One live view of store, warehouse, 3PL and online stock. Allocate, transfer, hold and reserve across the network.

04 **Reporting and analytics**

Live dashboards for margin, stockturn, category and store performance: from what is happening, to why, to what to do.

05 **Omnichannel orders**

One order view across in-store, online, click-and-collect, ship-from-store and marketplaces, with customer history, returns and loyalty.

06 **eCommerce integration**

Connect the online store to the same inventory, pricing and customer data as your physical stores.

CAPABILITIES

Key features for modern retail

- Pronto Xi POS App (ERP-integrated point of sale)
- Multi-location, real-time inventory management
- Purchase-order and supplier management with EDI
- Supplier chargeback and rebate tracking
- eCommerce integration
- Integrated financials and live reporting
- Analytics for retail decision support
- Omnichannel order management and fulfilment
- Mobile stocktaking and cycle counts
- Specialty retail support: matrix items, serial numbers and repairs

COMPLIANCE AND INTEGRATION

Connected to what matters

Tax, payroll and supply chain obligations handled in one platform, with direct integrations.

GST · STP · Payday Super · Modern Award · ATO integration · EDI · 3PL · Marketplaces

COMMON QUESTIONS

What is retail ERP software?

Software that runs POS, inventory, purchasing, supplier management, financials and eCommerce on one data model, so all channels work from the same live data.

Does Pronto Xi include a POS system?

Yes. The POS App is part of the ERP. Sales, stock, loyalty and pricing update as transactions happen, with no overnight batches or manual reconciliation.

How does retail ERP improve inventory accuracy?

Every sale, transfer, receipt and return updates one inventory record in real time. Cycle counts, mobile stocktakes and bin-level tracking help maintain accuracy.

Is it suitable for specialty and multi-format retailers?

Yes: specialty (serial numbers, repairs), fashion and apparel (matrix items, size-colour grids) and high-SKU general retail.
